

1. Write a query to validate login using username and password.

Query:

```
SELECT * FROM users  
WHERE username = 'input_username'  
AND password = 'input_password';
```

2. Fetch records created in last 7 days.

Query:

```
SELECT * FROM table_name  
WHERE created_at >= DATEADD(day, -7, GETDATE());
```

3. Find total number of records grouped by a column.

Query:

```
SELECT column_name, COUNT(*) AS total_records  
FROM table_name  
GROUP BY column_name;
```

4. Update salary based on condition.

Query:

```
UPDATE employees  
SET salary = salary * 1.10  
WHERE performance_rating = 'Excellent';
```
