

1. Check whether a number is positive or negative.

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter a number: ");
10        int num = sc.nextInt();
11
12        if (num > 0)
13            System.out.println("Positive");
14        else if (num < 0)
15            System.out.println("Negative");
16        else
17            System.out.println("Zero");
18    }
19 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.just

Enter a number: -4
Negative

2. Check whether a number is even or odd.

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter a number: ");
10        int num = sc.nextInt();
11
12        if (num % 2 == 0)
13            System.out.println("Even");
14        else
15            System.out.println("Odd");
16    }
17 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.just

Enter a number: 7
Odd

3. Find the largest of two numbers.

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter first number: ");
10        int a = sc.nextInt();
11
12        System.out.print("Enter second number: ");
13        int b = sc.nextInt();
14
15        if (a > b)
16            System.out.println("A is largest");
17        else
18            System.out.println("B is largest");
19    }
20 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.justj.openjd

Enter first number: 4
Enter second number: 2
A is largest

4. Find the largest of three numbers.

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter first number: ");
10        int a = sc.nextInt();
11
12        System.out.print("Enter second number: ");
13        int b = sc.nextInt();
14
15        System.out.print("Enter third number: ");
16        int c = sc.nextInt();
17
18        if (a > b && a > c)
19            System.out.println("A is largest");
20        else if (b > c)
21            System.out.println("B is largest");
22        else
23            System.out.println("C is largest");
24    }
25 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.justj.openjd

Enter first number: 4
Enter second number: 9
Enter third number: 5
B is largest

5. Check whether a year is a leap year.

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter year: ");
10        int year = sc.nextInt();
11
12        if ((year % 4 == 0 && year % 100 != 0) || year % 400 == 0)
13            System.out.println("Leap Year");
14        else
15            System.out.println("Not Leap Year");
16    }
17 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.full.win32.x86_

Enter year: 2014

Not Leap Year

6. Check whether a character is a vowel or consonant

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter character: ");
10        char ch = sc.next().charAt(0);
11
12        if (ch=='a' || ch=='e' || ch=='i' || ch=='o' || ch=='u' ||
13            ch=='A' || ch=='E' || ch=='I' || ch=='O' || ch=='U')
14            System.out.println("Vowel");
15        else
16            System.out.println("Consonant");
17    }
18 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.:

Enter character: y

Consonant

7. Check eligibility for voting based on age.

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter age: ");
10        int age = sc.nextInt();
11
12        if (age >= 18)
13            System.out.println("Eligible to vote");
14        else
15            System.out.println("Not eligible");
16    }
17 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\.p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.full\jre\bin\java.exe

Enter age: 15
Not eligible

8. Check whether a number is divisible by 5 and 11.

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter number: ");
10        int num = sc.nextInt();
11
12        if (num % 5 == 0 && num % 11 == 0)
13            System.out.println("Divisible by both");
14        else
15            System.out.println("Not divisible by both");
16    }
17 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\.p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.full\jre\bin\java.exe

Enter number: 66
Not divisible by both

9. Find grade based on marks (if-else-if ladder).

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter marks: ");
10        int marks = sc.nextInt();
11
12        if (marks >= 90)
13            System.out.println("Grade A");
14        else if (marks >= 75)
15            System.out.println("Grade B");
16        else if (marks >= 50)
17            System.out.println("Grade C");
18        else
19            System.out.println("Fail");
20    }
21 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.j

Enter marks: 85

Grade B

10. Check whether a number is zero, positive, or negative.

```
1 package sdet_selenium_Day_02;
2
3 import java.util.Scanner;
4
5 class Main {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8
9         System.out.print("Enter number: ");
10        int num = sc.nextInt();
11
12        if (num == 0)
13            System.out.println("Zero");
14        else if (num > 0)
15            System.out.println("Positive");
16        else
17            System.out.println("Negative");
18    }
19 }
```

Console X

<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.justj.

Enter number: 7

Positive

11. Find the smallest of three numbers.

```
1 package sdet_selenium_Day_02;
2 import java.util.Scanner;
3 class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         System.out.print("Enter first number: ");
8         int a = sc.nextInt();
9         System.out.print("Enter second number: ");
10        int b = sc.nextInt();
11        System.out.print("Enter third number: ");
12        int c = sc.nextInt();
13
14        if (a < b && a < c)
15            System.out.println("A is smallest");
16        else if (b < c)
17            System.out.println("B is smallest");
18        else
19            System.out.println("C is smallest");
20    }
21 }
```

Console × ⓘ Install Java 26 Support
<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.justj.openjdk

Enter first number: 4
Enter second number: 9
Enter third number: 2
C is smallest

12. Check whether a person is eligible for a loan (age + salary condition).

```
1 package sdet_selenium_Day_02;
2 import java.util.Scanner;
3 class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         System.out.print("Enter age: ");
8         int age = sc.nextInt();
9         System.out.print("Enter salary: ");
10        int salary = sc.nextInt();
11
12        if (age >= 21 && salary >= 25000)
13            System.out.println("Eligible for loan");
14        else
15            System.out.println("Not eligible");
16    }
17 }
```

Console × ⓘ Install Java 26 Support
<terminated> Main [Java Application] C:\Users\awalg\p2\pool\plugins\org.eclipse.justj.openjdk.h

Enter age: 25
Enter salary: 23000
Not eligible

13. Check whether a number is divisible by 3 or 7.

```
1 package sdet_selenium_Day_02;
2 import java.util.Scanner;
3 class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         System.out.print("Enter Number: ");
8         int num = sc.nextInt();
9
10        if (num % 3 == 0 || num % 7 == 0)
11            System.out.println("Divisible by 3 or 7");
12        else
13            System.out.println("Not divisible");
14    }
15 }
```

Console X Install Java 26 Support
<terminated> Main [Java Application] C:\Users\awalg\.p2\pool\plugins\org.eclipse.justj.openjdk.hotsp
Enter Number: 49
Divisible by 3 or 7

14. Simple calculator using switch case.

```
1 package sdet_selenium_Day_02;
2 import java.util.Scanner;
3 class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         System.out.print("Enter the operator(+ - * /): ");
8         char op = sc.next().charAt(0);
9         System.out.print("Enter first number: ");
10        int a = sc.nextInt();
11        System.out.print("Enter second number: ");
12        int b = sc.nextInt();
13
