

1. Login Functionality

Scenario: User logs into an application

Practice Areas: Positive/Negative testing, validation

Write test cases for:

- Valid username & password
- Invalid credentials
- Empty fields
- Password masking
- “Forgot Password” link
- Account lock after multiple failed attempts

TestCaseID	Test Scenario	Test Steps	Test Data
LOGIN-001	Login with valid username and password	Open app > Enter username > Enter password > Click Login	validuser / Valid@123
LOGIN-002	Login with invalid credentials	Enter invalid username/password and click Login	invalid credentials
LOGIN-003	Login with empty username	Leave username blank	Blank username
LOGIN-004	Login with empty password	Leave password blank	Blank password
LOGIN-005	Login with both fields empty	Click login without entering data	Blank fields
LOGIN-006	Password masking verification	Enter password in password field	Valid@123
LOGIN-007	Forgot Password link	Click Forgot Password	Registered email
LOGIN-008	Account lock after multiple failed attempts	Enter wrong password 5 times	Wrong password
LOGIN-009	Password case sensitivity	Enter password with wrong case	valid@123
LOGIN-010	Login after password reset	Reset password and login again	NewPass@123

Expected Result	Actual Result	Status
User logs in successfully	User logged in successfully	Pass
Error message displayed	Error displayed	Pass
Username required validation shown	Validation shown	Pass
Password required validation shown	Validation shown	Pass
Mandatory validation shown	Validation shown	Pass
Password should be masked	Password masked	Pass
Navigate to password reset page	Navigated successfully	Pass
Account should lock	Account locked	Pass
Login should fail	Login failed	Pass
Login successful	Login successful	Pass

2. Registration Form

Scenario: New user signup

Practice Areas: Field validation, boundary values

Write test cases for:

- Mandatory fields validation
- Email format validation
- Password strength rules
- Mobile number validation
- Duplicate user registration
- Submit with all valid inputs

TestCaseID	Test Scenario	Test Steps	Test Data
REG-001	Mandatory fields validation	Submit blank form	Blank form
REG-002	Valid email validation	Enter valid email	user@test.com
REG-003	Invalid email validation	Enter invalid email	user.com
REG-004	Password strength validation	Enter strong password	Strong@123
REG-005	Weak password validation	Enter weak password	12345
REG-006	Valid mobile number	Enter 10-digit mobile number	9876543210
REG-007	Invalid mobile number	Enter short mobile number	98765
REG-008	Duplicate user registration	Register using existing email	existing@test.com
REG-009	Submit with all valid inputs	Fill all fields and submit	Valid user details
REG-010	Boundary value for name field	Enter minimum valid characters	An

Expected Result	Actual Result	Status
Validation messages displayed	Validation shown	Pass
Email accepted	Accepted	Pass
Error shown	Error displayed	Pass
Password accepted	Accepted	Pass
Validation error shown	Error displayed	Pass
Mobile accepted	Accepted	Pass
Validation error shown	Error displayed	Pass
Duplicate error shown	Error displayed	Pass
Registration successful	Registered successfully	Pass
Name accepted	Accepted	Pass
